

The 900E Series exit features an architectural, slim design to fit into any environment. Attractive and functional, the 900E Series is completely self-contained and utilizes reliable, energy efficient LED illumination.

FEATURES

- Attractive specification-grade aluminum design
- High clarity acrylic panels
- Ceiling recessed, wall recessed, surface ceiling, wall or end mount
- Custom legends available
- 120/277VAC dual primary, 50/60Hz input
- Low voltage disconnect eliminates deep discharge
- Brown-out, short circuit and voltage surge protection
- Maintenance-free NiCad (NC), NiMH (G2) and SLA (WB) batteries
- Optional Guardian Self-Test/ Self-Diagnostics (A1/G2) available
- Constant, uniform illumination by long-life, high intensity, red or green LEDs
- Fully-illuminated 6" characters with 3/4" stroke
- Field selectable directional chevrons included for all configurations
- Standard finishes: Black, White or Brushed Aluminum
- Assembled in U.S.A.

WARRANTY

Any component that fails due to manufacturers defect is guaranteed for 25 years with a separate 5 year pro-rated warranty on the battery. The warranty does not cover physical damage, abuse or instances of uncontrollable natural forces. See the full Exitronix warranty document for detailed information.

Custom legends available

ORDERING INFORMATION Example: 902E-U-WB-RM-BA-G2

Series	Mounting	Power Source	Panel Color	Finish	Options (Factory Installed)
902E = Single Face	R = Recessed	LB = AC Only	RC = Red Letters/Clear Panel	WH = White	A1 ^{4,5} = Fire Alarm Interface w/Flasher
903E ¹ = Dbl. Face	WR ² = Wall Recessed U = Universal Surface	WB = With Battery NC = NiCad	RW = Red Letters/White Panel RM = Red Letters/Mirror Panel	BL = Black BA = Brushed Alum.	DR = Damp Location Rated G2 ^{4,5} = Self-Test/Self-Diagnostics
		2C1 ³ = 2 Circuit Input 120/120V	GC = Green Letters/Clear Panel		G2-220V ^{6,7} = Self-Testing/Self-Diagnostics
		2C17 ³ = 2 Circuit Input 277/277V	GW = Green Letters/White Panel		G2-230V ^{6,8} = Self-Testing/Self-Diagnostics
		2C117 ³ = 2 Circuit Input 120/277V	GM = Green Letters/Mirror Panel		G2-240V ^{6,9} = Self-Testing/Self-Diagnostics
Notes					IV = Inverted Mount EXIT Panel
¹ Double face available with white or mirror panel only					SS ¹⁰ = Specialty Signs
² Single face, clear panels only (RC or GC)					
³ 2CI not available with G2 option					
⁴ A1 and G2 options can not be combined					
⁵ Not available with NiCad battery option, NiMH only					
⁶ Available with battery units only, cannot be combined with any other options					
⁷ 220V version					
⁸ 230V version					
⁹ 240V version					
¹⁰ Consult factory for alternate legends and custom configurations					Accessories¹¹ (Field Installed)
¹¹ Order as separate line item, surface mount only					ER1-KIT = 1' Pendant Mount Kit ER2-KIT = 2' Pendant Mount Kit

CONSTRUCTION

Surface Mounting: Engineering grade aluminum extrusion with mounting canopy in either a powder coated or brushed aluminum finish

Recessed Mounting: Galvanized steel enclosure supplied with a trimplate and adjustable bar hanger

Panels - Constructed of high quality clear acrylic for maximum light output. Exit letters are 6" high with a 3/4" stroke. Double face panels are supplied with a mirror or white separator. Units are supplied with field selectable directional chevrons for all configurations.

ILLUMINATION

Illumination of the 900E series is accomplished utilizing high-intensity, long-life LEDs. LEDs are a maintenance-free solution, providing up to 100,000 hours of use without failure.

ELECTRICAL

Input

Dual-voltage input 120 or 277VAC @ 50/60Hz.

Sealed Lead Acid Battery - SLA (WB)

Extronix sealed lead acid batteries are maintenance-free with a life expectancy of 5 years. Lead Acid batteries perform optimally in temperatures ranging from 59°F - 104°F (15°C - 40°C).

Nickel Cadmium Battery - NiCad (NC)

Extronix nickel cadmium batteries are maintenance-free with a life expectancy of 15 years. Nickel cadmium batteries offer high discharge rates and continue to perform in a vast temperature range from 32°F - 104°F (0°C - 40°C).

Nickel-Metal Hydride - NiMH (With G2 or A1 option only)

Extronix NiMH batteries are maintenance-free with a life expectancy of 15 years. NiMH batteries perform optimally in temperatures ranging from 32°F to 104°F (0°C to 40°C).

Emergency

The 900E Series exit will operate for a minimum of 90 minutes during a loss of power with a 24 hour maximum recharge time for the battery.

Two-Circuit Operation (Option: 2C11, 2C17 or 2C117)

Two Circuit input allows for a primary and auxiliary power source to be connected to the emergency unit that does not contain a battery. Applications include those with invertors or alternate backup power sources.

Brownout Circuit

Brownout circuit monitors the line voltage, as the line voltage sags and can no longer illuminate the exit sign to meet UL924 visibility test, the emergency circuit will turn on to supply a portion or all the power to illuminate the sign for a minimum of 90mins until the line voltage is restored.

Low Voltage Disconnect

Low Voltage Disconnect (LVD) measures the battery terminal voltage. The LVD continuously monitors the battery terminal voltage and if it should fall below a preset voltage threshold, the LVD will disconnect the load. When the battery is recharging and voltage is raised above another preset voltage threshold, the load is automatically reconnected.

Test Button

The test button is easy to locate and provides manual verification of the transfer circuit and emergency lamps.

Dimensions

Solid-State Transfer (G2 or A1 options only)

Specifications are subject to change without notice. Installation must be performed in accordance with Barron Lighting Group installation instructions.

10800032 09/17

The circuit features solid-state switching for emergency lamps, eliminating concerns of damaged contact or mechanical failures associated with relays. The switching circuit detects a loss of line voltage and automatically switches to emergency mode.

Overload and Short-Circuit Protection

The overload monitoring system is a solid state circuit which monitors the lamp load and disconnects from the battery shall an overload or short circuit occur. The overload current protection eliminates the need for fuses or circuit breakers for the DC load.

INSTALLATION

Installs in minutes with easy-to read instructions and detailed diagrams. No special hardware or tools necessary. Internally housed components and battery.

Assembled in the U.S.A. (Standard)

Assembled in the U.S.A. and is in full compliance with the American Recovery and Reinvestment Act of 2009 (ARRA) requirements and Buy American provisions.

OPTIONS

Damp Location Rated (Option: DR)

Damp location rated fixture that is normally or periodically subject to condensation of moisture in, on or adjacent to, and includes partially protected locations.

Guardian Self-Test/Self-Diagnostics (Option: G2)

The Guardian circuit continuously monitors the operating condition of the AC power, battery supply voltage, emergency lamp continuity and charging circuit.

The purpose of this option is to provide visual signaling in response to a fault at the EXIT sign battery and/or battery charger. If a failure is detected, visual status will occur immediately via the CHARGER LED and/or the BATTERY FAULT LED. The LEDs will stay illuminated until the fault is corrected.

The Guardian circuit also monitors the transfer circuit as well as performing automatic code compliant testing. The Guardian circuit will perform a 30 second discharge and self-test every 28-30 days. A 90 minute discharge and self-test is performed every 6 months.

Fire Alarm Interface (Option: A1)

Our fire alarm interface option ties into the building's fire alarm system allowing for exits and emergency units to be triggered prior to loss of power.

A1: Fire alarm interface including Flasher option

Inverted Mount EXIT Panel (Option: IV)

The IV option is designed were the panel is inverted to allow the enclosure to be installed on a ledge application.

Custom and Specialty Legends (Option: SS)

Extronix offers a variety of standard specialty signs designed to provide directional or safety information in applications where clear and accurate delivery of information is required.

Examples of specialty legends include:

"X-RAY IN USE"	"ON THE AIR"
Restroom Signage	"DO NOT ENTER"
"NO SMOKING"	"OCCUPIED"
"AREA OF RESCUE ASSISTANCE" with modified accessibility symbol	

Custom Legends are also available - please call factory for details with questions.
