

# SURF

LED RIBBON FLEX

The SURF is an economical, commercial grade solution for your LED linear lighting needs. By providing optics within the Eco-friendly UV Resistant PVC housing, the SMD5050 LED's far exceeds the normal ribbon flex lumen level.

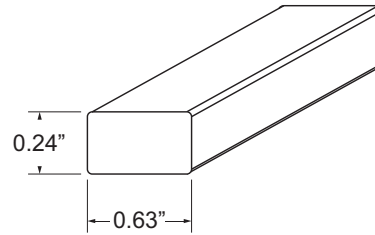

### Standard Features

- Extremely flexible, bends, twists and coils depending on your needs
- Available in several bright LED color options such as amber, blue, green, red and 4 variations of white
- RGB version allows you to reproduce a broad array of colors that can be changed utilizing a DMX controller
- Energy efficient LEDs consume 3.6W/ft or less, saving up to 70% or more over traditional neon
- Indoor and outdoor rated, IP65 and IP68 rated connections available
- Slim design allows installation in tight spaces without being visible
- Can be run in 65' lengths with power connected to both ends
- Dimmable to 100% with magnetic dimmer (supplied by others) and dimming transformer
- Field cuttable every 4"
- IP65 3 year warranty
- IP68 5 year warranty
- Full offering of connectors, accessories and transformers

### Applications

- Borders
- Cove lighting
- Bridges
- Gazebos
- Marine
- Roof lines
- Signage
- Accent lighting

### Ordering Information

**Example:** SURF-WW-65-24V

Series	Color		Length	Voltage
SURF	WW <sup>1</sup> = Warm White (2700K)	A = Amber	65 = 65 Feet	24V <sup>4</sup> = 24 Volt DC
	WP <sup>1</sup> = Pure White (3500K)	R = Red	XX <sup>3</sup> = Custom Length	
	WC <sup>1</sup> = Cool White (4500K)	G = Green		
	WD <sup>1</sup> = Daylight White (5700K)	B = Blue		
		RGB <sup>2</sup> = Color Changing		

#### Notes

- <sup>1</sup> Color temperature can vary ±5%
- <sup>2</sup> Requires DMX controller, ordered separately
- <sup>3</sup> Custom lengths ordered in feet (.333 increments)
- <sup>4</sup> Requires transformer, ordered separately
