Patient/Exam Rooms

Trace-lite's lighting solutions feature **tri-level illumination**, aesthetic appeal and are **sealed for cleaning and infection control**. Innovative optical technology provides powerful, focused, glare-free illumination for both medical professionals and patients, creating a relaxed, comfortable feel in any patient or exam room.

Surgical Suite

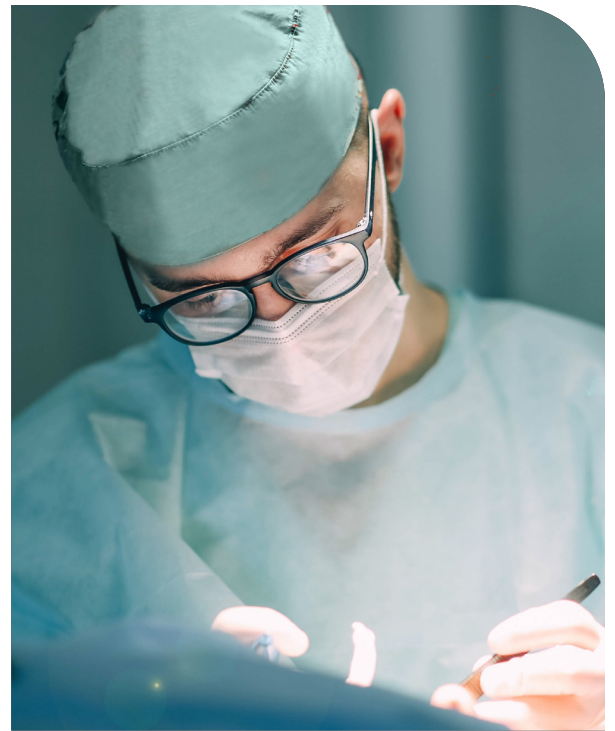

Surgical suite lighting maximizes the uniformity between the **surgical area, prep and clean up areas**, and the room perimeter and is designed to **minimize eye fatigue** during extended procedures. Surgical suite lighting solutions from Trace-lite are available with a variety of lighting levels, symmetric and asymmetric distributions and dimming options to fit a wide variety of applications.

MRI/Imaging Suite

Trace-lite MRI luminaires are constructed with **non-ferrous materials and RF-free electronics**, sealed against contaminants, are **easy to clean**, and able to withstand the most rigorous cleaning protocols.

Behavioral Health

Behavioral healthcare lighting is specifically designed to address the **safety and security** concerns of these critical spaces. Trace-lite luminaires are robust enough to **protect patients** from destructive behavior and self-harm. Tamper- and impact-resistant construction and **ligature resistant designs** ensure patient and staff safety, as well as prevent the hiding of contraband and damage to the fixtures.
