

The Sierra 3 is a three phase, on-line, double conversion, solid state inverter system utilizing patented ECM technology. The system consists of a solid-state inverter; a temperature compensated rectifier/battery charger, a continuous duty static switch, an internal maintenance bypass switch, battery plant, status/control panel, and synchronizing circuitry. The Sierra 3 shall function in conjunction with the existing building electrical system to provide high quality power conditioning, back-up power protection and distribution for lighting loads and other critical loads. The enclosure is a Nema 3R (outdoor) rain/weather resistant enclosure designed for outdoor environmental conditions.

Model: _____ Date: _____
Accessories: _____
Job Name: _____ Type: _____

SPECIFICATIONS

- Standard Power Level:** *3.0, 4.5, 6.0, 8.0, 10.0, 12.0, 16.0, 20.0, 24.0, 30.0, 40.0, 60.0, 80.0, 100.0 and 125.0KW
- Input Voltage:** 208Y/120,480Y/277, 208 or 480 VAC
- Input Voltage Range:** +10% -15%
- Output Voltage:** 208Y/120, or 480Y/277 VAC
- Output Voltage Regulation:** ±3% for all loads and battery discharge mode
- Output Frequency Range:** 60 Hz, ±1%
- Output Wave Form:** Sine-wave <5% @ 100% linear load
- Crest Factor:** 2.5:1 typical
- Input Protection:** Input Main Circuit Breaker
- Output Protection:** Output Main Circuit Breaker
- Surge Protection:** The unit will protect itself and the load against surges defined in ANSI/IEEE C62.45 category A/B
- Battery:** Sealed maintenance-free (AGM) lead calcium
- Recharge Current:** Conforms to UL924 standards
- External Battery:** Provision for hardware connection of external battery cabinets or DC source
- Efficiency:** ≥92% at 100% linear load
- Audible Noise:** <45dBA
- Operating Temperature:** -20°C to 50°C (-4°F to 122°F)
- Storage Temperature:** -30°C to 60°C (-22°F to 140°F)
- Humidity:** 5 - 100%, Non-condensing
- Cabinet:** NEMA 3R
- Compliance:** Assembled in the USA with global components. American Recovery and Reinvestment Act (ARRA) compliant

* No line loads for 3.0-6.0KW units

ORDERING INFORMATION Example: SIE3-8-208-208Y/120-RP-90

Series	Power Rating	Input Voltage ¹	Output Voltage ¹	Options	Run Time ⁴
SIE3	3 = 3.0KW	208Y/120	208Y/120	ECM120/# ² = 120V Environmental Control Module / Qty	5 = 5 Min

POWER RATING

3,000 - 125,000 watt, three phase output unit uses the latest technology to provide the most advanced performance and reliability features

INPUT

208Y/120, 480Y/277, 208 or 480 VAC

AC Input Characteristics

- Input Frequency: 60 Hz
- Power walk-in: 0 to 100% over a 10-second period
- Magnetizing Inrush Current: Less than nominal input current for less than one cycle
- Input Surge Protection: The Sierra 3 is equipped with standard input filter assembly will withstand surges per IEEE 587-1980/ANSI C62.41

OUTPUT

208Y/120 or 480Y/277 VAC

AC Output Characteristics

- True "on-line" design is $\geq 92\%$ efficient at 100% linear load
- Voltage Regulation: + 3% for no-load to full load and full 90 minute battery discharge mode
- Frequency: 60 Hz (+ 0.1Hz when free running)
- Voltage Distortion: Maximum 5% total (THD) @ 100% linear loads
- Voltage Transient (Step Load) Response:
 - $\pm 5\%$ for 50% step load change
 - $\pm 8\%$ for 100% step load change
 - $\pm 3\%$ for loss or return of AC input power or manual transfer at full load
- Voltage Recovery Time: Return to within 3% of nominal value within 50 milliseconds
- Phase Angle Displacement: $120^\circ \pm 1^\circ$ for balanced loads; $120^\circ \pm 3^\circ$ for 50% unbalanced load
- Non-Linear Load Capability: Output voltage total harmonic distortion shall be less than 8% when connected to a 100% non-linear load with a crest factor not to exceed 2.5%
- Slew Rate: 1 Hz/second maximum
- Power Factor: Unity power factor
- Inverter Overload Capability:
 - 125% of rated load for 1 minute
 - 145% of rated load for 10 seconds
- Bypass Overload Capability: > 200% for one cycle; > 150% for 30 seconds

BATTERIES

The Sierra 3 unit uses a valve regulated sealed lead calcium heavy-duty industrial battery, designed for auxiliary power service. The primary battery is furnished with an impact resistant plastic case and housed in a matching battery cabinet(s). (Systems up to 10KW are self-contained).

- Protection against Deep Discharge and Self-Discharge: The Sierra 3 is equipped with a device designed to protect the battery against deep discharge depending on discharge conditions, with isolation of the battery by a circuit breaker. In particular, a monitoring device to adjust the battery shutdown voltage as a function of a discharge coefficient to avoid excessive discharge.
- Battery Self-Test: The battery monitoring system performs the following automatic functions:
 - Battery circuit check
 - Partial discharge test customer selectable
- Sealed, maintenance-free, lead calcium (AGM) batteries
- 10 year prorated warranty
- Guardian Smart Battery Monitoring System is TEMPERATURE COMPENSATED maintaining maximum runtime and battery life
- Microprocessor controlled recharge and overcharge protection is standard

LAMPS AND LOADS

- Emergency power provides FULL LIGHT OUTPUT from all lamps and fixtures for the entire runtime
- Standard or LED Exits and other safety equipment
- Standard or electronic ballasts, dimming devices or panels, sensors and most control equipment
- Operates fluorescent, compact fluorescent, incandescent, quartz, LED and other lamp types

PROTECTION

- Provides overload, surge and undercurrent protection using the latest technology and Guardian Diagnostics to protect system performance and reliability
- Surge protection against load surges as defined in ANSI/IEEE C62.45 category A and B

CODES

- City of Chicago and New York approved
- Complies with the Buy American Act (Level 3)
- The Sierra 3 shall meet the requirements of the following standards:
 - IEEE 587-1980/ANSI C62.41 1980 Standards for Surge Withstand Ability
 - FCC rules and regulations of Part 15, Subpart J, Class A
 - Meets UL 1778, UL 924, Standards for Lighting Inverter Equipment
 - NEMA PE 1 (National Electrical Manufacturers Association) - Lighting Inverter Systems
 - NEMA 250 (National Electrical Manufacturers Association) – Enclosures for Electrical Equipment (1000 Volts Maximum)
 - NFPA 70 – National Electrical Code
 - ISO 9001
 - Occupational Safety & Health Administration (OSHA)

DIAGNOSTICS, MAINTENANCE AND ACCESSIBILITY

All Sierra 3 sub-assemblies, as well as the battery, are accessible from the front only. The Sierra 3 design provides maximum reliability and minimum MTTR (mean time to repair). The electronic Sierra 3 control and monitoring assembly is fully microprocessor based. The unit is repairable by replacing standard subassemblies.

- Guardian Diagnostics provides complete self diagnostic capabilities and LED monitoring
 - Informative advanced display and alarms allow complete control of your emergency lighting environment
 - Automatically performs periodic self-tests ensuring a safely lighted environment prior to an emergency
 - Single point of testing instead of multiple testing points with battery packs

CABINET

- Modular design that enables flexible installation
- Enclosure: The Sierra 3 is housed in a NEMA 3R freestanding enclosure. The mechanical structure of the unit is sufficiently strong and rigid to withstand handling and installation operations without risk. Access to Sierra 3 subassemblies are through the front only. The sheet-metal elements in the structure are protected against corrosion by a suitable treatment, such as zinc electroplating, powder coating, epoxy paint or an equivalent
- Systems up to 10KW are self contained; larger systems require external battery cabinet(s.)
- Cable Access: The Sierra 3 allows for side, top and bottom entry cables.
- Ventilation and Heat Rejection: The Sierra 3 is designed specifically for forced air cooling for maximum reliability. Air inlets are provided from the front, bottom of the Sierra 3 enclosure. Air exhaust is achieved from the top or side portions of the unit

INSTALLATION

- Modular design allows easy installation in electrical closet or other convenient locations
- Phone assisted factory start-up standard for all systems
- Extended warranty available
- The Sierra 3 shall operate under the following environmental conditions:
 - Temperature:
 - Operating: -20° to 50°C (4°F to 122°F)
 - Non-Operating: -30°C to 60°C (-22°F to 140°F)
 - Relative humidity (operating and storage): 5 to 100% non-condensing
 - Barometric Pressure:
 - Up to 1000 meters above sea level
 - Up to 2000 meters with ambient temperature less than 28°C
 - Up to 12,000 meters above sea level non operating
 - Audible Noise: 45dBA at 3 feet
 - Enclosure is Nema 3R outdoor completely sealed, includes heat exchanger for complete environmental control of electronics and batteries.
- Site Testing and Start-Up: If selected, the inverter system will be checked, started and tested by a manufacturer's qualified field service engineer either by phone start-up (standard) or by optional onsite start up when performed by a factory technician

SPECIAL APPLICATIONS

- Barron offers numerous UL924 optional devices to meet unusual or difficult application parameters
- ECM – Eco-Control Module allows fixtures and lamps on the emergency circuit(s) to be operated by normal switching and/or dimming devices in NON-emergency conditions
- Dimming Panel Interface allows use with emergency lights controlled by common dimmer panel

DELIVERY, STORAGE, AND HANDLING

- All products shall be packaged in a manner to prevent penetration by debris and to allow safe delivery by all modes of ground transportation and air transportation where specified
- Prior to shipping all products shall be inspected at the factory for damage
- Equipment shall be protected against extreme temperature and humidity and shall be stored in a conditioned or protected environment
- Equipment containing batteries shall not be stored for a period exceeding three months without powering up the equipment for a period of eight hours to recharge the batteries

WARRANTY

- One (1) year full warranty on system electronics (with phone assisted start-up), consult factory for Onsite Start-Up option warranty
- Battery warranty one (1) year with nine (9) years pro-rated
- Five (5) year power train warranty
- Maintenance contracts available
