

DESCRIPTION

The VPA-CP Series LED linear vaportight features robust construction with an IK08 impact-tested polycarbonate housing, designed for easy installation with direct, toolless access to the driver compartment. The UV-stabilized, frosted polycarbonate lens provides impressive general illumination and is available in 2', 4', and 8' configurations. Now power switchable, the VPA-CP Series offers 2' models with selectable wattages of 20W, 25W, or 30W; 4' models with selectable wattages of 25W, 35W, or 50W; and 8' models with selectable wattages of 60W, 75W, or 90W. Internal switches allow users to select the CCT between 3500K, 4000K, and 5000K. An optional integral microwave sensor, centered behind the lens, offers two- or three-step level dimming, along with light thresholds and daylight harvesting capability. Additionally, a battery backup option ensures emergency egress lighting for 90 minutes. The VPA-CP Series is rated NEMA 4X and is designed for indoor and outdoor covered spaces requiring protection from dust, dirt, and water. It also meets NSF certification for applications in Food Zone, Splash Zone (surfaces subject to splash and food spillage), and Non-Food Zone areas. With the availability of 45-degree angle brackets, this series offers a robust, cost-effective, and easy-to-install solution, perfect for both new construction and retrofits.
