

DESCRIPTION

Similar to our already popular FBT-RGB, the WAVE-RGB offers additional flexibility to your creative designs due to its back to front bending orientation. Corners and angles can now be installed seamlessly with the Wave-RGB. The Wave-RGB Series combines constant current, color blending technology with a flexible polyvinyl chloride housing to create a durable, extremely bright, uniform illumination with color versatility that makes it perfect for any custom design application.

The Wave-RGB has a low square profile that allows for a tighter, more precise viewing pattern while providing increased lumen output due to its internal optic.
