

Lighting for Correctional

Trace-lite's correctional LED lighting solutions provide **secure, reliable and tamper-resistant illumination** and feature durable housings that maximize impact resistance as well as prevent contraband concealment.

Correctional

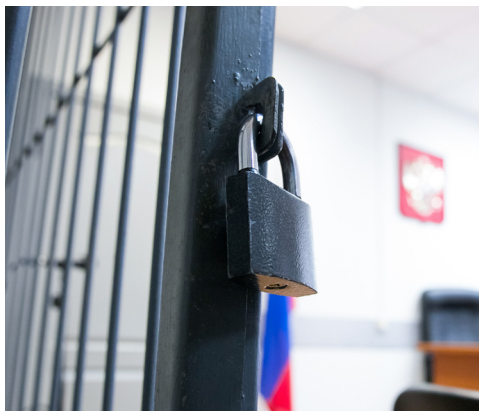

Trace-lite correctional luminaires are built specifically for this challenging environment and feature **tamper-proof designs**, heavy gauge steel construction and durable polycarbonate or tempered glass lenses. Fixtures must meet the highest standards for **withstanding abuse**, repeated tampering and **attempts at contraband concealment**.

In secure areas where inmates are transferred into a facility, or from one area of the facility to another, the **quality of lighting** has a large impact on **safety and security**.
